On second thought let's not worry about the NEPA, this is a resource protection project. We're not doing NEPA on spring rehab and road oblit either.

Jamie's archeological seasonal Florence, is available 26Aug03, to monitor reclamation of spring. Dena has fence line flagged also, so I'll have her check this also. We'll probably need to do decision memo for fence so it may Fall before the fence is completed. I would also like to schedule meeting with Del Kunzler prior to installation of fence, just to make sure he is okay with it and has place for new trough.
